SEPARATELY MANAGED ACCOUNTS PROGRAM

Data as of June 30, 2025

ALL INFORMATION HEREIN AS OF JUNE 30, 2025 UNLESS OTHERWISE NOTED.

MISSION STATEMENT

Washington Crossing Advisors' mission is to serve with competency and integrity the interests of clients and their trusted advisors. In our view, there can be no better way to safeguard the viability and future success of our business than to deliver on that promise. To this end, we are determined to be a leader in innovation, education, and ethics, and we extend this commitment to both those we serve and those who work with and for us.

Who We Are | Washington Crossing Advisors, LLC (WCA) is a Registered Investment Adviser headquartered in Morristown, NJ, with employees based in Chicago and San Francisco. WCA was founded in 2000 and launched its first strategy in 2004.

As of December 31, 2024, WCA manages total assets of over \$10 billion.

What We Provide | We deliver investment strategies as models or Separately Managed Accounts. Disciplines include quality and dividend-focused equity strategies, fixed income portfolios, and tactically-managed ETF portfolios.

Our Investment Philosophy | We believe that market exploitable anomalies exist as a byproduct of groupthink and human nature. Process-driven investment strategies can help avoid common pitfalls, potentially leading to better long-run results.

QUALITY INVESTING IN A RISKY WORLD

The world is a riskier place than many understand or realize. Shocks to the financial system can roil markets and turn a portfolio on its head.

1987: Black Monday

1990: Iraq Invades Kuwait

1991: Japan Asset Bubble Bursts

1992: Pound Sterling Crashes

1994: Treasury Bond Losses

1997: Asian Financial Crisis

1998: Russia Debt Default

2000: Dot-Com Bubble Bursts

2001: 9/11 Terrorist Attacks

2002: Accounting Scandals

2007: U.S. Housing Bubble Bursts

2008: Financial Crisis

2010: European Sovereign Debt Crisis

2010: “Flash” Crash

2011: U.S. Sovereign Debt Downgrade

2015: China Market Crash

2018: Global Growth Worries

2020: Coronavirus Pandemic

2022: Russia Invades Ukraine

2023: Middle East Conflict

WASHINGTON CROSSING ADVISORS

RISING DIVIDEND PORTFOLIO

2Q2025

SEPARATELY MANAGED ACCOUNTS PROGRAM

Data as of June 30, 2025

POLICIES AND GUIDELINES

POLICY	GUIDELINE
Return Objective	Long-term capital appreciation with rising dividend stream
Risk	Seeks below-market volatility, greater return consistency
Factor Exposure	High quality, low volatility
Constraints	Quality companies; minimum 5 years dividend increases
Holding Period	Intermediate (3-5 years)
Liquidity	High
Taxes	Tax efficient and low turnover (10-20%)
Number of Positions	30-40
Position Size	2.5-4% of portfolio value
Total Strategy Assets	\$5.5 Billion
Sector Exposure Limit	Individual sector exposure limited to 30%
Holding Size Limit	Max size 2x target weight

QUALITY, NOT “STYLE”

TRADITIONAL APPROACH

OUR APPROACH

We are focused on quality, volatility, and price (not “style” and size)

WCA “QUALITY” A DIFFERENT TAKE ON AN OVERUSED WORD

QUALITY COMPANIES TEND TO BE:

- Predictable: Steady business
- Flexible: Profitable assets
- Durable: Low debt

LOW QUALITY COMPANIES TEND TO BE:

- High yielding
- Over indebted (i.e., Financials)
- Financially engineered
- Overly complex
- Capital intensive (i.e., Airlines)
- Commodity businesses (i.e., Energy)

CAUTIONARY TALE OF LEVERAGE AND DEBT

Many “quality” portfolio managers use agency credit ratings to identify “quality” despite past failures of such ratings. WCA developed proprietary quality grades, differentiating our assessment from others.

FIRM	2006 S&P RATING	2006 LEVERAGE ¹	2006 YR END STOCKS \$	2008 YR END STOCKS \$	ACQUIRER
Bear Stearns	A	29-1	\$160	\$9	JPM Chase
Washington Mutual	A-	13-1	\$45	\$0	JPM Chase
AIG	AA	10-1	\$60	\$1	U.S. Government ²
Fannie Mae	AAA	20-1	\$59	\$1	U.S. Government
Countrywide Financial	A	14-1	\$42	\$4	Bank of America
Wachovia	A+	13-1	\$57	\$5	Wells Fargo
Lehman	A+	13-1	\$78	\$0	Barclays/Nomura
1. Assets/Equity 2. Majority owner. Source: Standard & Poor's; Bloomberg.					

WCA QUALITY GRADE: PROPRIETY QUALITY ASSESSMENT

WCA employs a unique process that ranks companies in our investment universe by quality factors including LEVERAGE, PROFITABILITY, and CONSISTENCY. We then assign letter grades “A” through “F” and organize businesses by quintile rank.

<div>HIGH QUALITY</div> <div></div> <div>LOW QUALITY</div>	WCA QUALITY LETTER GRADE	WCA QUALITY SCORE
	A	80-100
	B	60-80
	C	40-60
	D	20-40
	F	0-20

THE WCA INVESTMENT FUNNEL: A REPEATABLE APPROACH

THE WCA INVESTMENT PROCESS: AN ONGOING PROCESS

VALUATION

- Total firm value perspective
- 5-year forecast horizon

PORTFOLIO OPTIMIZATION

- Seeks to maximize expected return relative to expected risk

RISK ASSESSMENT

- Review Quality scores and other assumptions
- Monitor factors influencing performance
- Adjust course as necessary

BUY AND SELL DISCIPLINE

BUY DISCIPLINE

- Buy companies that increase the expected risk-adjusted return of the portfolio.
- Return is estimated based on current price, expected dividend, and our 5-year estimated valuation.
- Risk is measured based on volatility and expected deviation from the WCA Rising Dividend custom benchmark of quality, dividend-increasing companies.

SELL DISCIPLINE

- Overvalued relative to our 5-year estimated value, reducing risk adjusted return.
- Dividend cut or not raised.
- Deterioration of quality or fundamental outlook.
- Change in business model or competitive position.
- Accounting/regulatory issues.

TOP 10 HOLDINGS AS OF JUNE 30, 2025

DESCRIPTION	SYMBOL	DIV YIELD %
Marsh & McLennan Companies	MMC	1.53
Walmart, Inc.	WMT	0.97
Visa, Inc.	V	0.67
Microsoft Corporation	MSFT	0.67
Waste Management, Inc.	WM	1.47
Colgate-Palmolive Company	CL	2.26

There is no assurance that any of the securities noted will remain in the portfolio at the time you receive this presentation. Actual holdings and percentage allocation in individual client portfolios may vary and are subject to change. It should not be assumed that any of the holdings discussed were, or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable. Excludes cash/cash equivalents. The portfolio can hold up to 5% in cash/cash equivalents.</p>		

GICS SECTOR ALLOCATION AS OF JUNE 30, 2025

RISK MANAGEMENT PRACTICES: IDENTIFY, MEASURE, MANAGE

BEST PRACTICES/LEADING EDGE

Risk control measures are primarily implemented through our proprietary stock selection and portfolio construction process to confirm and empirically validate investment process drivers:

- Sector constraints
- Individual security constraints
- Quality attribute monitoring
- Tracking error time series
- Proprietary WCA Beta
- Conditional VAR
- Scenario
- Proprietary Macro Factor Model
 - Stress Tests
 - Fair Value
- Portfolio characteristics
- Portfolio attribution by various groupings

RISK GOVERNANCE: IDENTIFY, MEASURE, MANAGE

RISK CONTROL AND OVERSIGHT

- Periodic risk meetings to review compliance with aforementioned portfolio risk management metrics
- Actively maintained proprietary risk metrics for appropriate guideline management
- Steve Lerit, CFA, Head of Portfolio Risk for Washington Crossing Advisors

Prior experience includes:

- Co-Chair of CFA NY Society Risk Group
- Founding member of Global Association of Risk Professionals Curriculum Exam Development Committee
- Instructor for CIPM/CFA exam review
- Published in professional journals
- Conference speaker
- Editor for quant textbooks

RESULTS

Data as of June 30, 2025

STATISTICS VS. BENCHMARKS (MAY 2011 – JUNE 2025)

On a risk-adjusted basis, the Rising Dividend strategy outperformed the benchmark.

Source: Zephyr.

STATISTICS VS. BENCHMARKS (MAY 2011 – JUNE 2025)

The Rising Dividend strategy displayed less frequent and less extreme outlier returns than the benchmark.

	Alpha	Beta	Asymmetry ¹	Fat Tails ²	Tracking Error
Rising Dividend (Gross of Max 3% Fee)	1.67	0.76	-0.12	0.33	6.33
Rising Dividend (Net of Max 3% Fee)	-1.33	0.76	-0.12	0.33	6.33
S&P 500 TR	0.00	1.00	-0.36	0.65	0.00
	Alpha	Beta	Asymmetry ¹	Fat Tails ²	Tracking Error
Rising Dividend (Gross of Max 3% Fee)	4.27	0.71	-0.12	0.3	7.12
Rising Dividend (Net of Max 3% Fee)	1.18	0.71	-0.12	0.3	7.12
Bloomberg 1000 Value TR	0.00	1.00	-0.45	2.18	0.00

Source: Zephyr. 1. Negative asymmetry: frequent small gains and a few extreme losses (however, result not significantly different from zero). 2. A greater percentage of both large and small return surprises compared to normal “bell-shaped” distribution. Please see Important Definitions at the end of this presentation.

STATISTICS VS. BENCHMARKS (MAY 2011 – JUNE 2025)

The Rising Dividend strategy Beta was 0.78 during market rallies and 0.64 during market declines.

ADVANCING MARKETS Upside Capture • Beta: 0.78

DECLINING MARKETS Downside Capture • Beta: 0.64

■ Rising Dividend (Gross of Max 3% Fee) ■ S&P 500 TR ■ Rising Dividend (Net of Max 3% Fee)

Portfolio evaluation period (May 2011-June 2025) vs S&P 500 Index. Rising and Declining Markets based off of 115 Positive Months vs 55 Negative Months. Past performance does not guarantee future results. A client's return will be reduced by the advisory fees and any other expenses. Investment advisory fees are described in Part 2 of Washington Crossing Advisors Form ADV. Sources: Bloomberg, Zephyr, WCA. Please see Important Definitions at the end of this presentation.

GROWTH OF \$100,000 (MAY 2011 – JUNE 2025)

Past performance does not guarantee future results. Performance figures do not reflect the deduction of investment advisory fees. A client's return will be reduced by the advisory fees and any other expenses. Investment advisory fees are described in Washington Crossing Advisors Form ADV Part 2A. The chart above is for illustrative purposes only and is not representative of any WCA client. The chart illustrates the growth of a \$100,000 initial investment made on May 1, 2011 and includes reinvestment of dividends or other earnings. It assumes no withdrawals or contributions. Any results shown may not represent the actual experience of individual investors. Individual account performance may differ due to, for example, account size, cash flows, investment objectives, investment restrictions, economic and/or market factors, and fees. Sources: Bloomberg, WCA.

VALUE PROPOSITION SUMMARY

Quality Investments | Portfolio construction informed by the notion that (1) quality persists, tends to be underappreciated, and undervalued (2) the marketplace tends to misunderstand value investing. Quality is one of the few anomalies that produces consistent risk-adjusted alpha over time.

Dividend Growth Focus | Dividend growth is a marker of quality and thus a means to an end rather than an end in itself.

Factor Exposure | Quality, Low Volatility.

Portfolio Alpha | Generated by (1) identifying quality at reasonable prices (2) understanding and adapting to risk (3) employing a repeatable process.

Expertise | Proven track record in various market environments from highly experienced management team.

Selection Ability | Quantitative process links valuation to key fundamental risks.

Valuation | Proprietary valuation process focuses on whole capital structure.

Capital Preservation | Flexibility in market exposure with a long only bias.

Discipline | Mitigate risk by focusing on what can go wrong and striving to avoid bubbles—strict buy and sell discipline.

Common Sense Approach | Owning great businesses with reasonable valuation.

Patience | Value is usually found during periods of negative psychology or misperception.

Avoid Yield “Trap” | Limits exposure to risk, low return, and high degree of interest rate sensitivity.

WASHINGTON CROSSING ADVISORS

Kevin R. Caron, CFA, Senior Portfolio Manager

Mr. Caron is a Senior Portfolio Manager and co-founder of Washington Crossing Advisors (WCA). Kevin's experience as an analyst, strategist, and portfolio manager spans over 30 years. Kevin is a popular speaker on markets and economy-related issues and comments regularly for various local and nationally syndicated media outlets. Such outlets include CNBC, PBS, Fox Business, Bloomberg, *The Wall Street Journal*, Reuters, Forbes, CBS Radio, and Dow Jones.

Kevin began his investing career at Gruntal & Company in 1992 as a sell-side research associate covering electric utilities. In 1994, he joined Sterling Advisors, an investment advisory unit of Gruntal & Co., as an analyst. In 1997, Kevin left Sterling to help form Gruntal's strategy team as a market strategist. In this role, he was instrumental in developing and communicating the firm's views on the economy and financial markets. Today, Mr. Caron is responsible for developing investment strategies, identifying opportunities, and communicating WCA's market and investment views with advisors, clients, and the public.

Kevin earned his Bachelor's of Science degree in Economics from Seton Hall University in 1991. He is a CFA charterholder and New York Society of Securities Analysts member. Kevin lives in Chatham, NJ, with his wife, Tara, and their two children.

Chad A. Morganlander, Senior Portfolio Manager

Mr. Morganlander serves as a Senior Portfolio Manager and co-founder of Washington Crossing Advisors. He shares responsibility as co-portfolio manager across each of the group's investment advisory programs. Mr. Morganlander has held several investment advisory and analyst positions for Stifel and predecessor firms, including Ryan, Beck & Company and Gruntal & Company. He began his career in 1992 at Lehman Brothers.

Mr. Morganlander brings nearly 30 years of financial market, investment advisory, and portfolio management experience to the WCA platform. The WCA multi-disciplinary investment platform has assets over \$8 billion under management and advisement. Chad regularly comments on the global economy and financial markets on various media outlets, including CNBC, Dow Jones, BNN, Bloomberg, CBS radio, Fox News, *The Wall Street Journal*, and Reuters.

Mr. Morganlander graduated from Ramapo College, where he received his Bachelor of Arts Degree in International Business.

WASHINGTON CROSSING ADVISORS

Matthew J. Battipaglia, Portfolio Manager

Mr. Battipaglia serves as a Portfolio Manager for Washington Crossing Advisors. In addition to co-managing portfolios across each of the group's investment advisory programs, Mr. Battipaglia also supports the group's trading and marketing efforts.

Mr. Battipaglia began his career in 2005 as an Operations Analyst at SEI Investments Company. In 2007, Mr. Battipaglia was hired by Janney Montgomery Scott to help start the Cost Basis/Tax Reporting department. He was hired by Washington Crossing Advisors in 2011.

In 2005, Mr. Battipaglia earned his Bachelor of Arts Degree in Economics from Dartmouth College and, in 2011, earned his Master of Business Administration from Drexel University. He holds the series 65 license.

Matthew lives in Doylestown, PA, with his wife, Kelly, and their two daughters.

Steven J. Leric, CFA, Head of Portfolio Risk

Mr. Leric is the Head of Portfolio Risk for Washington Crossing Advisors. He collaborates with advisors to help design and explain portfolio solutions that meet specific needs of private client, high net worth, and institutional investors for equity, fixed income, and multi-asset portfolios.

Steve was formerly Head of Quantitative Risk for UBS Wealth Management, Asset Manager for U.S. Trust/Bank of America, Investment Analyst for New York Life Investment Management LLC and Market Risk Analyst for JP Morgan Chase. He has extensive experience applying advanced statistical methods, data science and operations research to portfolio construction, risk management and investment manager selection and performance evaluation.

Steve is the Co-Chair of the Performance and Risk Group and a former Director at CFA NY, where he has taught courses for CFA and CIPM exam preparation. He was a founding and longstanding member of the Education Committee of GARP, which awards the Financial Risk Manager (FRM) designation. Steve is an advisory board member, contributor and top reviewer for *The Journal of Performance Measurement*. He has served as a subject matter expert on stress testing for regulatory purposes and a manuscript reviewer for textbooks on data science and applied financial statistics. Steve has a BA from Rutgers and an MBA from NYU Stern School of Business. He holds series 7 and series 63 licenses.

WASHINGTON CROSSING ADVISORS

Mike Spero, Chief Compliance Officer

Mr. Spero joined the firm's parent company, Stifel Financial, in April 2021 where he serves as a Director of Advisory Compliance. Prior to joining Stifel Financial, Mike was a Compliance & Risk Control Manager with Freddie Mac. Mike has more than 20 years of experience in financial services compliance, including compliance positions with UBS, KBC Financial Products, JPMorgan, New Mountain Capital, Tiger Legatus Capital Management as Chief Compliance Officer, and Frontline Compliance. Mike received his BA in History from Boston University and is an Investment Adviser Certified Compliance Professional (IACCP®).

Baiba McGibben, Operations Director

Ms. McGibben oversees operations and daily trading for Washington Crossing Advisors. She joined the firm's parent company, Stifel Financial, in 2007 where she worked in operations, trade support and reporting for multiple asset management affiliates including Montibus Asset Management and Thomas Weisel Fixed Income Group. Prior to the joining Stifel, Baiba worked for Thomas Weisel Partners, where she held multiple positions in corporate finance and institutional trading groups. Earlier in her career, Ms. McGibben worked as unit cost and risk analyst at Bank of New York.

Baiba received a Bachelor's of Science degree in Economics and Finance from Seton Hall University in South Orange, NJ. She lives in the San Francisco Bay Area with her family.

Suzanne Ashley, Relationship Manager

Suzanne Ashley serves as the Relationship Manager for Washington Crossing Advisors, an in-house advisory program offered through Stifel's private client group, running the sales and marketing effort for the financial advisors at Stifel. Suzanne began her career in 1988 at Manufacturers' Hanover Trust Co. in New York City as a corporate trust officer which then led to an Institutional Fixed Income sales position at Chase Securities Inc.

Suzanne graduated from Boston College in 1988 with a Bachelor of Arts Degree in Economics and Philosophy. Suzanne lives in Verona, NJ with her husband Mark.

WASHINGTON CROSSING ADVISORS

Eric Needham, Director, Sales and Marketing

Eric Needham joined WCA in 2020 as Director of Sales and Marketing. Prior to joining WCA, he was Director of Sales and Marketing for the Central United States at Ziegler Capital Management, LLC (“ZCM”) from 2015 to 2020. Prior to joining ZCM in 2015, Eric held similar roles at Keeley Asset Management and DWS Investments. Eric is currently responsible for business development and client service within the Broker/Dealer, RIA, and Family Office communities. He has over 13 years of experience in the investment management industry.

Eric graduated from University of Northern Colorado with a degree in Business Finance and a minor in Computer Information Systems. Eric lives in Chicago with his wife, Luanne, and their daughter.

Jeffrey Battipaglia, Client Portfolio Manager

Jeff Battipaglia joined Washington Crossing Advisors in 2021 after working with the Corporate Strategy team at Bank of New York Mellon. At WCA, his primary areas of focus include portfolio research and analysis, business development and client service efforts. Prior to beginning his career in financial services, Jeff spent seven years in the Marine Corps serving in Okinawa, Japan and San Diego, California.

Jeff graduated from the U.S. Naval Academy and earned his MBA from NYU’s Stern School of Business. He lives in Westfield, NJ with his wife, Emily, and their son.

IMPORTANT DEFINITIONS

Alpha | The difference between the benchmark return and the portfolio return, which may be either positive or negative, adjusted for risk.

Asymmetry/Skewness | When a distribution of returns has unequal sides around its median.

The shape of a return distribution describes the extent to which realized performance varies from what might be expected in a “normal world”. In a normal world return surprises are represented by extreme events whose magnitude and frequency can be predicted with a high degree of precision using advanced statistical techniques. When an investment strategy exhibits “non-normal” returns, the magnitude and frequency of return surprises exceeds what is suggested by these techniques. Non-normal return distributions share the same return and risk statistics with normal return distributions. Hence, standard performance statistics like Sharpe and information ratios will be the same for both normal and non-normal return distributions. However, non-normal return distributions display a different shape, i.e., with an extended tail to the left reflecting higher downside risk in market drawdowns.

Beta | A measure of the sensitivity of a given investment or portfolio to movements in the overall market. Beta measures the risk level of the manager. Beta measures the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. A beta equal to one indicates a risk level equivalent to the market. Higher betas are associated with higher risk levels, while lower betas are associated with lower risk levels. A beta of 1 indicates that the security’s price will move with the market. A beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 indicates that the security’s price will be more volatile than the market. For example, if a stock’s beta is 1.2, it’s theoretically 20% more volatile than the market. A beta of greater than 1 offers the possibility of a higher rate of return, but also poses more risk.

Bloomberg 1000 Equal Weight Total Return Index | The Bloomberg 1000 Equal Weighted Total Return Index is a float equal-weighted benchmark of the 1000 most highly capitalized U.S. companies.

Bloomberg 1000 Value Total Return Index | The Bloomberg 1000 Value Total Return Index measures the performance of those Bloomberg 1000 Index companies with lower price-to-book ratios and lower forecasted growth values.

Conditional Value at Risk (CVaR) | Average potential loss in the left tail of the distribution with only a 5% chance that the loss will exceed that of the CVaR amount.

Downside Capture | Downside Capture is a measure of managers’ performance in down markets relative to the market itself. A down market is one in which the market’s quarterly return is less than zero. The lower the manager’s down-market capture ratio, the better the manager protected capital during a market decline. A value of 90 suggests that a manager’s losses were only 90% of the market loss when the market was down. A negative down-market capture ratio indicates that a manager’s returns rose while the market declined. For example, if the market fell 8% while the manager’s returns rose 2%, the down-market capture ratio is -25%.

IMPORTANT DEFINITIONS

Drawdown | A drawdown refers to how much an investment or trading account is down from the peak before it recovers back to the peak.

Fat Tails/Kurtosis | A collection of observations whose magnitude and frequency exceed that of what would be expected if the observations were deemed to normal or bell-shaped.

GICS | The Global Industry Classification Standard (GICS®) was developed in 1999 by S&P Dow Jones Indices and MSCI. The GICS methodology aims to enhance the investment research and asset management process for financial professionals worldwide. It is the result of numerous discussions with asset owners, portfolio managers, and investment analysts around the world. It was designed in response to the global financial community's need for accurate, complete, and standard industry definitions. The GICS methodology has been widely accepted as an industry analysis framework for investment research, portfolio management and asset allocation. Its universal approach to industries worldwide has contributed to transparency and efficiency in the investment process, and the GICS methodology supports the trend towards sector-based investing.

Normal Probability Plot | A graphic depiction of the extent to which an actual distribution resembles a hypothetical normal distribution.

S&P 500 Index | The Standard & Poor's 500 Index is a capitalization-weighted index that is generally considered representative of the U.S. large capitalization market.

S&P 500 Value Index | The S&P 500 Value Index measures value stocks using three factors: the ratios of book value, earnings, and sales to price. S&P Style Indices divide the complete market capitalization of each parent index into growth and value segments. Constituents are drawn from the S&P 500®.

Sharpe Ratio | Sharpe Ratio is one of two alternative, yet similar, methods of measuring excess return per unit of risk (The other method is the Treynor Ratio). In the case of the Sharpe Ratio, risk is measured using the standard deviation of the returns in the portfolio. The Sharpe Ratio relates the difference between the portfolio return and the risk-free rate to the standard deviation of that difference for a given time period.

Standard Deviation | Standard Deviation is a gauge of risk which measures the spread of the difference of returns from their average. The more a portfolio's returns vary from its average, the higher the standard deviation. It is important to note that higher than average returns affect the standard deviation just as lower than average returns. Thus, it is not a measure of downside risk. Since it measures total variation of return, standard deviation is a measure of total risk, unlike beta, which measures market risk.

Tracking Error | Tracking error is the difference in actual performance between a position (usually an entire portfolio) and its corresponding benchmark.

Upside Capture | Upside Capture is a measure of managers' performance in up markets relative to the market itself. An up market is one in which the market's quarterly return is greater than or equal to zero. The higher the manager's up-market capture ratio, the better the manager capitalized on a rising market. For example, a value of 110 suggests that the manager captured 110% of the up market (performed ten percent better than the market) when the market was up. A negative up-market capture ratio indicates that a manager's returns fell while the market rose. For example, if the market gained 8% while a manager's returns fell 2%, the up-market capture ratio would be -25%/0.

IMPORTANT DEFINITIONS

Washington Crossing Advisors High Quality Index and Low Quality Index | The Washington Crossing Advisors' High Quality Index and Low Quality Index are objective, quantitative measures designed to identify quality in the top 1,000 U.S. companies. Ranked by fundamental factors, WCA grades companies from "A" (top quintile) to "F" (bottom quintile). Factors include debt relative to equity, asset profitability, and consistency in performance. Companies with lower debt, higher profitability, and greater consistency earn higher grades. These indices are reconstituted annually and rebalanced daily. For informational purposes only, and WCA Quality Grade indices do not reflect the performance of any WCA investment strategy.

Z Score | Standardized measure of how far away an individual observation is from the universe median.

IMPORTANT DISCLOSURES

Past performance should not and cannot be viewed as an indicator of future performance. For use in this one on one presentation only. Not for public distribution. Gross returns presented do not reflect the deduction of investment advisory fees. Actual client returns will be reduced by advisory fees and any other expenses it may incur in the management of the investment advisory account. WCA's advisory fees are described in the Firm's ADV Part 2A. Data provided by Bloomberg, Zephyr, and Morningstar, Inc. All performance figures are presented through end of period unless otherwise indicated.

Washington Crossing Advisors (WCA) is a wholly-owned subsidiary of Stifel Financial Corp. (NYSE: SF). The firm's list of composite descriptions is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm.

The information contained herein has been prepared from sources believed to be reliable but is not guaranteed and is not a complete summary or statement of all available data nor is it considered an offer to buy or sell any securities referred to herein. Affiliates of WCA may, at times, release written or oral commentary, technical analysis, or trading strategies that differ from the opinions expressed within. Opinions expressed are subject to change without notice and do not take into account the particular investment objectives, financial situation, or needs of individual investors. This presentation often expresses opinions about the direction of market, investment sector, and other trends. The opinions should not be considered predictions of future results.

The information contained in this report is based on sources believed to be reliable, but is not guaranteed and not necessarily complete. All investments involve risk, including loss of principal, and there is no guarantee that investment objectives will be met. It is important to review your investment objectives, risk tolerance, and liquidity needs before choosing an investment style or manager. Equity investments are subject generally to market, market sector, market liquidity, issuer, and investment style risks, among other factors to varying degrees. Fixed Income investments are subject to market, market liquidity, issuer, investment style, interest rate, credit quality, and call risks, among other factors to varying degrees. There is no assurance that any securities discussed herein will remain in any account's portfolio at the time you receive this report or that securities sold have not been repurchased. Changes in market conditions or a company's financial condition may impact a company's ability to continue to pay dividends, and companies may also choose to discontinue dividend payments.

The Bloomberg 1000 Value Total Return Index measures the performance of those Bloomberg 1000 Index companies with lower price-to-book ratios and lower forecasted growth values. The Bloomberg 1000 Equal Weight Total Return Index is a float equal-weighted benchmark of the 1000 most highly capitalized U.S. companies.

The volatility of the indices identified in this presentation may be materially different from the volatility of the portfolios presented by WCA. Indices are unmanaged, do not reflect fees and expenses, and are not available for direct investment.

WCA does not provide tax, legal or accounting advice. This material has been prepared for informational purposes only, and is not intended to provide, and should not be relied on for, tax, legal or accounting advice. You should consult your own tax, legal and accounting advisors before engaging in any transaction.

All investments involve risk, including possible loss of principal, and there is no guarantee that investment objectives will be met. It is important to review your investment objectives, risk tolerance, and liquidity needs before choosing an investment style or manager. Equity investments are subject generally to market, market sector, market liquidity, issuer, and investment style risks, among other factors to varying degrees. Fixed Income investments are subject to market, market liquidity, issuer, investment style, interest rate, credit quality, and call risks, among other factors to varying degrees. Exchange Traded Funds (ETFs) are subject to market risk, including the possible loss of principal, and may trade for less than their net asset value. ETFs trade like a stock, and there will be brokerage commissions associated with buying and selling exchange traded funds.

A minimum investment applies within the various investment advisory programs. There are other costs associated with these programs, including but not limited to: execution costs for trades effected with other broker-dealers, exchange fees, transfer or other taxes, interest expense, any third-party account or administrative fees, wire transfer fees, any internal expenses charged by mutual funds or other investment companies, and the costs associated with products and services not described in the applicable Advisory Agreement. Investors should consider all terms and conditions before deciding whether the Stifel Opportunity Program is appropriate for their needs.

Registration with the SEC does not imply a certain level of skill or training.
